

Volcanoes

By: Angel and Andrés

Vocabulary

- **Ash**= Cenizas
- **Magma**= Magma
- **Vent**= Respiradero
- **Plate tectonics**= Tectónica de placas
- **Hot spot**= Lugar caliente
- **Dormant**= Inactivo
- **Fissure volcano**= Volcanes de fisura
- **Caldera volcano**= Caldera del volcán
- **Dust**= Polvo
- **Tephra**= Trefra
- **Lava**= Lava
- **Caldera**= Caldera
- **Volcanologist**= Volcanólogo
- **Trenches**= Trincheras
- **Fissure volcano**= Volcanes de fisura
- **Shield volcano**= Volcán escudo
- **Dome volcano**= Volcán cúpula
- **Ash-cinder volcano**= Cenizas de volcán
- **Composite volcano**= Volcán compuesto
- **Bomb**= Bomba

Summary

This book tells us very important and fun things about volcanoes.

There are many volcanoes around the world. Some erupt and some are dormant.

There are some types of tephra, like Bomb, lapilli, ash and dust.

There are many types of volcanoes: Fissure volcanoes, shield volcanoes, dome volcanoes, ash-cinder volcanoes, composite volcanoes and caldera volcanoes.
