### Kata-kata pertama

"I'll make sure to spread premium products which people are interested in, which consequently could then correlate with the income to which we both receive. I've been using shitcash for a long time and have made a fairly nice consist flow of revenue, however I'd like to start spreading on this fairly bit better site. I'll make sure to which the items I am spreading, people will be interested in and will without hesitation download them. I had a website advertising my eBooks, however the hosting went down and thought it'd be a better option to spread via forums as mentioned above, advertising premium items to which people desire. I'll also advertise using simple spreading techniques, such as pastebin/youtube/facebook. These all

have been very successful in the past (this is if having \$45 - \$60/ day is considered successful) and I hope to pass my expertise in these onto my fileice account. Thanks”

5. Setelah itu, klik **Confirm** gan.

Nah, kata-kata berikut ini kita pakai kalo kata-kata di atas gagal. Ane masih punya kata-kata yang lain sih, ntar aja, kalo agan gagal mulu, PM ane aja gan, wkwkwk

I have used other Marketing sites which use Pay-Per-Download Methods such as Sharecash and currently FileFlare. My idea was to transfer my methods to here and help you guys with your Beta program. My friends have informed me that this was one of the best PPD websites out there so I would like to be apart of that. My affiliate marketing experience is quite high. My average amount each month is around \$400 using my high traffic based methods. I'm a founder of many blogs that have download links that i plan to content lock. One method of business is having my viewers go to my website and download the goods that catch their eye, they already content locked with ShareCash. These are the real legal programs for businesses everywhere that ask me to advertise their products. I advertise every possible way I can. Some examples of where I post are Forums, Games, Video Sharing websites, etc. Not only do I support a lot of downloads, I also pull in a big sum of customers everywhere. As I said earlier my experience is quite high dealing with all the other PPD websites that I try out and rate. Sharecash is a really nice website, it just doesn't pay enough. FileFlare pays a lot just isn't well put together, also the staff is only one member. Fileice seems to have everything that I am looking for. My goal is with unique techniques gain a lot more publicity and share the a good word to everyone. These are some of my very few ways. I aim to help Fileice in its beta stage with all my idea's that I want to share.
