

Learning activity 2 / Actividad de aprendizaje 2

Evidence: Taking care of the planet / Evidencia: Cuidando el planeta

In this evidence, you will have to record an audio file suggesting solutions for the rubbish problem. Use **should**, **must** and the semi-modal **have to** in the answer. / En esta evidencia, usted deberá grabar un archivo de audio sugiriendo soluciones para el problema de las basuras. Use **should**, **must** y el semi-modal **have to** en la respuesta.

Example / Ejemplo:

Rubbish is a big problem in our society. I suggest that people **should** recycle materials. We **should** recycle paper, plastic bottles, batteries, and other materials that are reusable. We **have to** take care of our planet. We **have to** save water, electricity and other natural resources. We **must** love our nature and take care of it.

Solutions:

The environmental pollution

The environmental problem is a global problem that concerns us all. How to solve the problem of waste and environmental pollution?

The prevention of pollution or pollution control input, is a production solution, which reduces or eliminates the production of pollutants, often changing chemicals or using less harmful processes.

Contamination can be avoided (or at least reduce) with four "Rs" of the use of resources: **Reject**: do not use, **Reduce**, **Reuse**, **Recycle**

Environment (what should and should not do).

You **should** plant a tree every year.
You **should** get your own cup of coffee.
You **should** take shorter showers.
You **should** turn off the lights when you leave a room.
You **should** separate materials to recycle them.
You **should** use rechargeable batteries.

You **shouldn't** cut down trees.
You **shouldn't** use too much disposable material.

You **shouldn't** brush your teeth with running water.
You **shouldn't** leave your computer on during the whole night.
You **shouldn't** put garbage together.
You **shouldn't** throw batteries into the garbage

Carlos **must** clean the river
The school **must** educate children and protect the environment
They **must** help you with your work
They **must** help to clean up the neighborhood
You **must** go home

The planet **must be** decontaminated
The Bogotá river **must be** decontaminated
Henry **must be** a leader in environmental decontamination
I **must be** a leader in my neighborhood, in protecting the environment

I **have to** recycle batteries
I **have to** shower with cold water
I **have to** turn off the bulbs
I **have to** pick up the trash
I **have to** save water
I **have to** save energy
I **have to** plant trees

In this way I learned. Use **should**, **must** and the semi-modal **have to** in the answer.

Cordially,

PEDRO ESTEBAN FERREIRA VANEGAS
Apprentice SENA
